Since Danger Mouse dared to mix the Beatles and Jay-Z together, the internet has been awash with mash-ups and bizarre audio cocktails - such as the recent YouTube hit that conjoined Rick Astley's Never Gonna Give You Up to Nirvana's Smells Like Teen Spirit. Apart from passing amusement, few survive a couple of listens. That's not the case with remixer extraordinaire Doctor Rosen Rosen who, via the wonders of technology and a sensible approach to the copyright law, has completely transformed the whole of Lily Allen's album *It's Not Me*. Distorting her vocals and coming up with completely new arrangements, Allen now sounds dark, majestic and a bit creepy. You can download the whole thing for free. Elsewhere, similar trickery is deployed to Eminem, Britney and the *Lost* soundtrack.
